

wherein the member is movable on the rod.

*Please replace current claim 14 with the following:*

14. The apparatus of claim 12, wherein the fixture further includes a medial-to-lateral slide to which the reference guide attaches, enabling either condyle or the trochlear region to be used as a reference for subsequent resection.

*Please add new claim 16 as follows:*

16. The apparatus of claim 12, wherein the cutting guide is movable relative to the member.
